# CONTINUANCE

## *The Eternal Flow of Life*

"Continuance" is a series of circular canvases that encapsulate the ceaseless and fluid nature of existence. Each canvas in this collection is a portal into the rhythmic dance of life, where beginnings and endings meld into one another, forming a seamless loop of perpetual motion. The circular shape of the canvases itself is symbolic, representing the infinite cycle of life, death, and rebirth, a concept deeply rooted in various philosophical and spiritual traditions.

The paintings are a vibrant interplay of colors and geometric patterns, each element meticulously crafted to convey the dynamic essence of life's journey. The circles within circles, spirals, and interwoven lines depict the interconnectedness of all beings and events. Every stroke and hue carries a narrative, a fragment of the larger story of existence, illustrating how life continually moves forward, despite obstacles and changes.

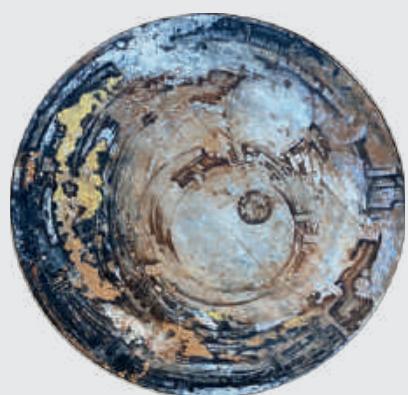

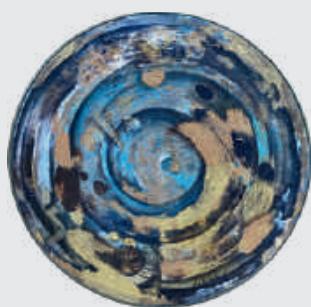

One of the core themes of "Continuance" is the idea that life is not a linear path but rather a series of cycles and phases. The circular format of the canvases emphasizes this notion, inviting viewers to contemplate the endless progression of time and the recurring patterns that define our experiences. Each canvas in the series offers a unique perspective on this theme, with variations in color schemes, textures, and compositions that reflect the diverse facets of life's continuum.

The vibrant and bold colors used in the paintings are not merely aesthetic choices but are imbued with symbolic meanings. Warm hues like reds and oranges signify energy, passion, and the vitality of life, while cooler tones like blues and greens evoke calm, reflection, and growth. The juxtaposition of these colors creates a dynamic visual experience, mirroring the ebb and flow of emotions and experiences that shape our existence.

# BOUNDLESS

## *Exploring the Interplay of Structure and Freedom*

"Boundless" invites the viewer to contemplate the interplay between boundaries and freedom. The circular shape of the artwork symbolizes wholeness and eternity, while the geometric forms within it represent the myriad possibilities and pathways in life. The painting's title, "Boundless," reflects the infinite potential that lies within these forms and the idea that true freedom comes from embracing both structure and spontaneity.

This is a captivating geometric composition that encapsulates the essence of infinity within its circular frame. This artwork intricately blends structure and color, creating a visual experience that is both profound and expansive.

The painting is dominated by an interplay of red and brown tones, punctuated by subtle hints of turquoise and beige. These colors converge and diverge across the canvas, creating a layered effect that draws the viewer into its depths. The geometric forms within the circle are meticulously arranged, forming a complex network of lines and shapes that suggest both order and chaos.

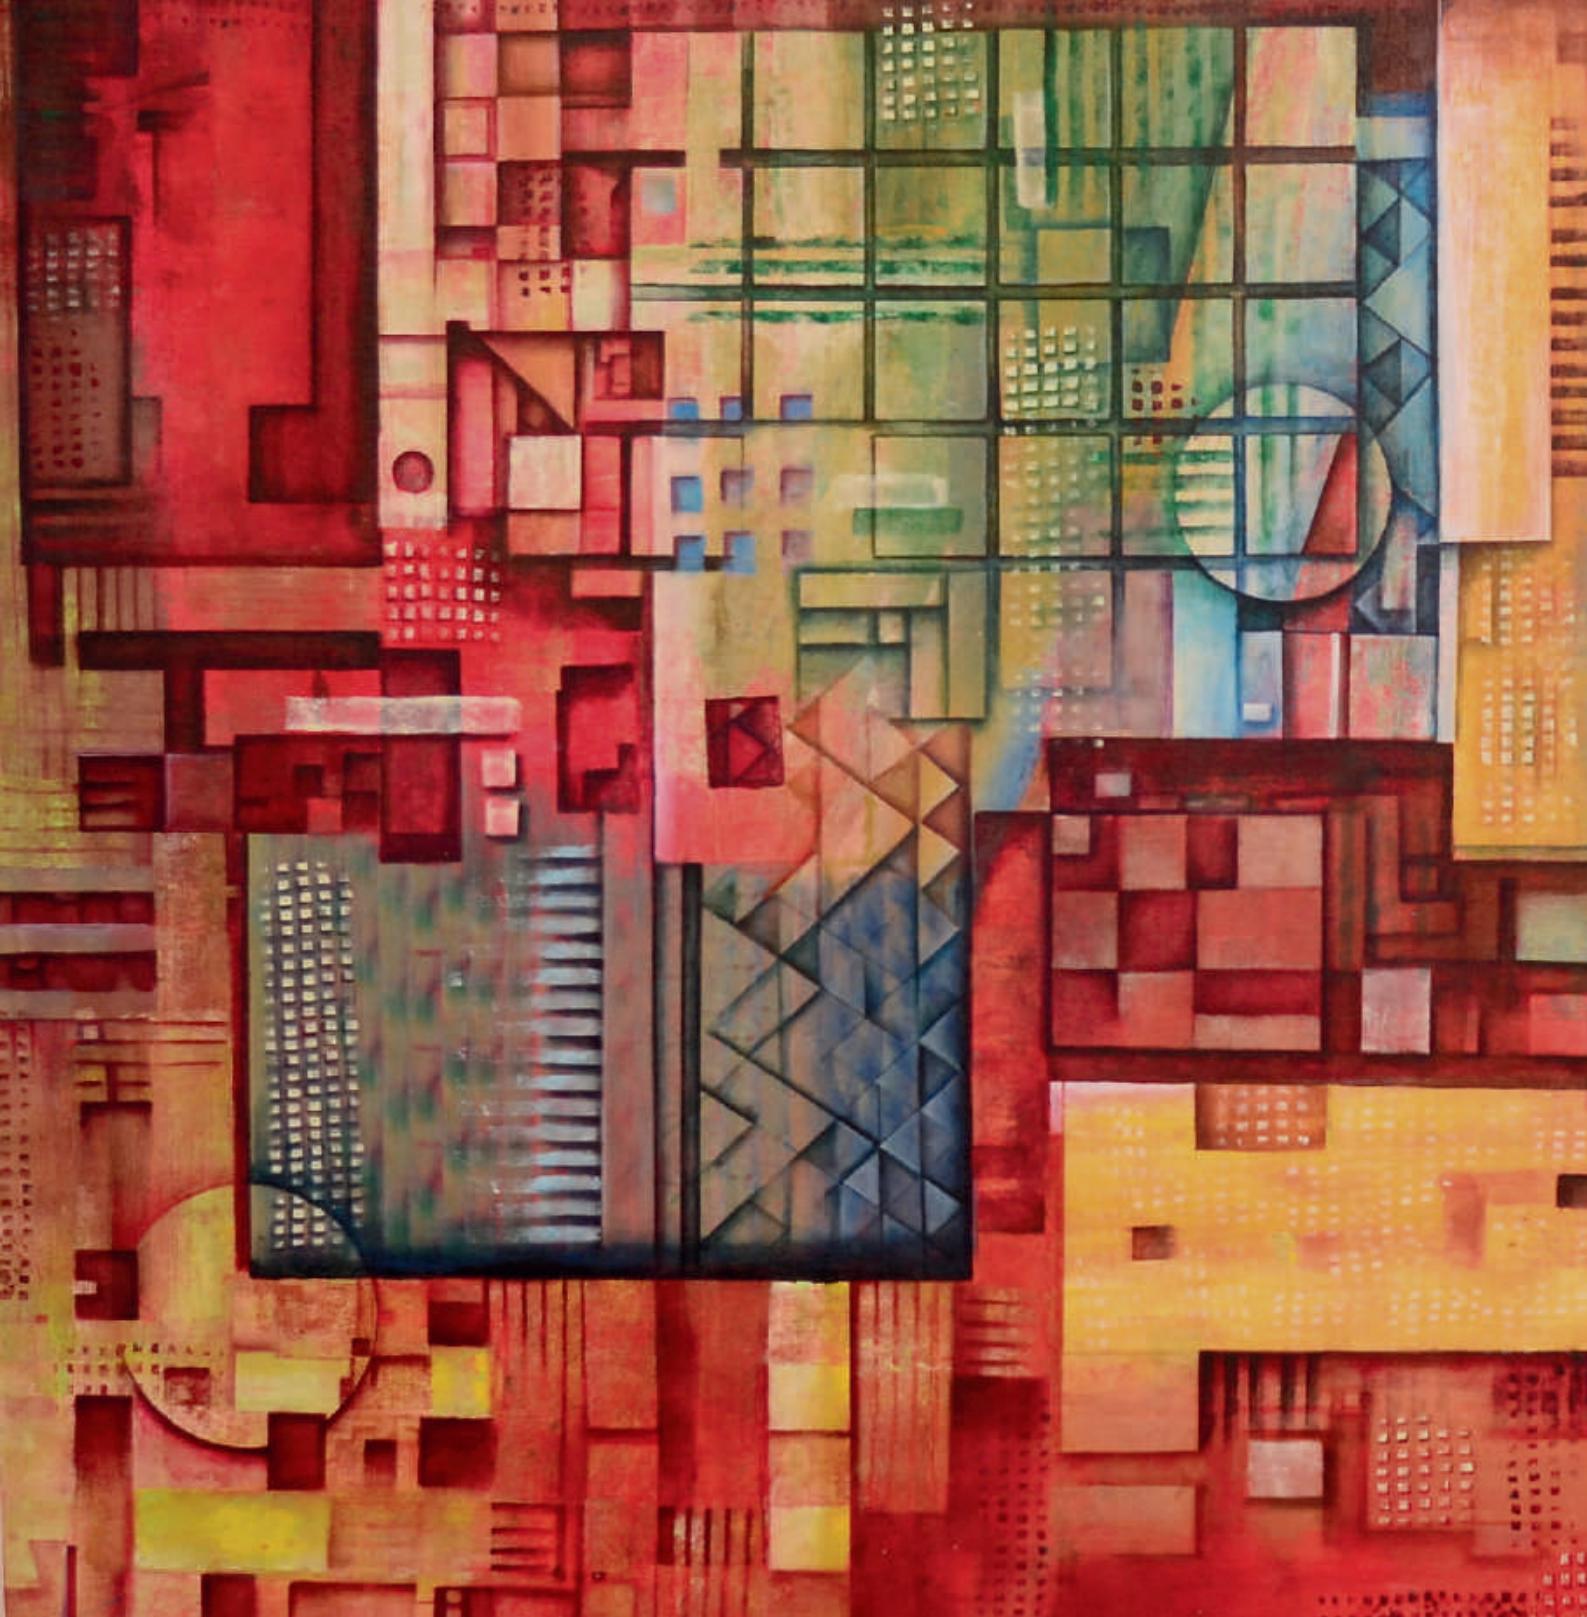

The horizontal and vertical lines in "Boundless" create a pattern, reminiscent of urban landscapes and architectural blueprints. This structured approach is contrasted by the organic texture and variations in color, which introduce a sense of movement and fluidity.

"Boundless" is not just a visual journey but also a philosophical exploration of the limits and expanses of human experience.

***Ekta Jain*** is a promising star on the horizon of art and artistry.

*Ekta's artwork is autobiographical and bears a close resemblance to her never say-die spirit and cheerful demeanour, finding vivid translation in her aesthetically pleasing formations and fabrications on the canvas.*

*Her lucid and fluent strokes are both articulate and eloquent. Her abstracts are reflective of hope and faith; of assurance and conviction; of trust & optimism. Her assertive flourishes, select themes and choice of hues support the same thought line.*

*The core theme of Ekta Jain's portrayals remain 'Hope and Never to Despair' which cannot escape the onlooker's attention. The illuminated niches, ray of light dancing in the dark crevices; beam of radiance dispelling the gloom - are subtle statements occupying the focal point in her creations.*

*Her interplay with splashing colours started at a tender age till it metamorphosed into emphatic narrations. Her journey to urban spaces is punctuated by her desire to discover layers upon layers of soul's responses to civility or lack of it. The innate desire led her to formulate and execute her concept. Her arches link urban space to traditional architecture. Her paintings are like palimpsest.*
